

## Lab Assistant (m/f/d)

Within start-up-like structures, we provide services to our customers in the automotive, aerospace and consumer goods sectors in a dynamic market. The business is built on materials, system solutions, components and services in the 3D printing sector and we work closely with global research platforms as well as BASF application technicians and cooperate with research institutes, universities, startups and industrial partners.

**LOCATION**  
Heidelberg, DE

**COMPANY**  
BASF 3D Printing Solutions GmbH

**WORKING HOURS**  
Full-time

**CONTRACT TYPE**  
Temporary

**WORKING AREA**  
Research & Development

**REFERENCE CODE**  
EN59300474\_ONLE\_1

### RESPONSIBILITIES

- Our unit Powder Bed Fusion (PBF) produces the new Forward AM Ultrasint® powders who set new standards in 3D printing using polymer powders and enable new possibilities for advanced applications, from functional prototyping through to end-use serial production parts.
- o Support our team as a lab assistant with post-processing of 3D printed parts, i.e. de-powdering, unpacking as well as sand and ice blasting.
  - o You will also be responsible for the powder handling, i.e. storage, mixing, packaging, and sieving as well as the regular cleaning of facilities and machines that where in contact with plastic powder.
  - o Both the packaging and shipment handling for shipments to external partners and customers and the shipment handling and control for incoming materials will be part of your work.
  - o Furthermore, you provide a detailed documentation of performed projects and tasks.
  - o Finally, you are responsible for keeping a safe and reliable lab operation, i.e. supporting safety assessments, performing regular equipment checks, supporting QMS development and implementation.

### BENEFITS

- o Onboarding to help you settle in quickly, ensuring you are part of the BASF team from day one.
- o An attractive competitive salary that is based on the company's success and your individual performance.

### ABOUT US

If possible, please upload the documents into one single PDF file. Please note that we do not return paper applications including folders. Therefore please submit only copies and no originals.

We create chemistry

BASF 3D Printing Solutions GmbH, headquartered in Heidelberg, Germany, is a 100% subsidiary of BASF New Business GmbH. It focuses on establishing and expanding the business under the Forward AM brand with advanced materials, system solutions, components and services in the field of 3D printing. To serve customers in the dynamic 3D printing market, BASF 3D Printing Solutions is organized into startup-like structures. It cooperates closely with the global research platforms and application technologies of various departments at BASF and with research institutes, universities, startups and industrial partners. For further information please visit: [www.forward-am.com](http://www.forward-am.com)

**At BASF, the chemistry is right.** Because we are counting on innovative solutions, on sustainable actions, and on connected thinking. And on you. Become a part of our formula for success and develop the future with us - in a global team that embraces diversity and equal opportunities irrespective of gender, age, origin, sexual orientation, disability or belief.

**Together we can accomplish everything. Through the power of connected minds.**
